Warisan is well known for being one of the finest producers of artful and well-built furniture for the *tropical climate*. Offering rich and luxurious pieces for every venue, the company continues to grow, in clientele and in reputation.

The Ultimate Measure of Comfort

These pages: Fine, luxurious furniture, perfect for the tropics.

"FOR MORE THAN 20 YEARS, THE COMPANY HAS BEEN MANUFACTURING FURNITURE FOR INTERNATIONAL HOTELS AND RESORTS, FULFILLING LARGE CONTRACT FURNITURE ORDERS, WHILE STILL BEING FLEXIBLE ENOUGH TO SUPPLY MORE SPECIALIZED ORDERS."

Established in 1989 as a purveyor of high quality antiques, Warisan has progressively grown to become a modern production facility, with several offices and showrooms worldwide.

For more than 20 years, the company has been manufacturing furniture for international hotels and resorts, fulfilling large contract furniture orders, while still being flexible enough to supply more specialized orders.

Warisan has the ability to provide customized designs in large or small quantity. Warisan is also a supplier of fine residential furniture, selling to the private sector through showrooms and franchises worldwide. The showrooms showcase the latest designs from exclusive collections, along with the very best antiques and unique pieces.

For interior designers, Warisan can either work

according to their customized specifications, or offer an extensive range of furnishings in several styles, including neo colonial, minimal and contemporary designs.

Their objective is commitment to the client and to ensure client satisfaction, they make themselves available for customer needs, providing a complete service that can meet the most exigent needs at competitive prices.

Recently, a new, luxury outdoor collection was announced, with pieces created in-house by Indonesian designers, Adi and Ayu, and inspired by their work for leading hotels and residences internationally. Adi and Ayu “dug deep” to take what they know of wonderful outdoor teak wood construction and reinterpret it into something new, yet timeless. For added spice, they also chose to incorporate some of the more natural appearing synthetics and aluminium to broaden the pallet for those seeking alternatives to teak.

These pages: Sleek, inventive outdoor seating; Finely crafted barstool and coffee table.

"AS IN ALL WARISAN
FURNISHINGS, THESE
NEW OUTDOOR
COLLECTIONS ARE
CHARACTERIZED BY
QUALITY, DURABILITY
AND FUNCTIONALITY,
BALANCED WITH WISE
STEWARDSHIP OF
NATURAL RESOURCES
TO GIVE COMPETITIVE
PRICES WITH THE BEST
AESTHETIC VALUE..."

As in all Warisan furnishings, these new outdoor collections are characterized by quality, durability and functionality, balanced with wise stewardship of natural resources to give competitive prices with the best aesthetic value. These elegant, handmade, comfortable collections are designed to complement any garden, terrace, pool, public area, shore line, restaurant or café. Each piece sports artistic touches and sculptural elements to complement the buyer's own patch of paradise.

Quality, aesthetic beauty and functionality are combined to meet the tastes of an increasingly demanding clientele. The concept of the collection is to bring the luxury and elegance of handmade furniture to the outdoor setting, and the pieces are ideal for both commercial and residential environments, combining contemporary design with an amazing level of comfort.

The furniture is constructed using weather resistant materials suitable for outdoor use. The materials used have been carefully chosen for their ability to withstand both hot and cold climates, rain or shine.

Solid teak wood and elegant Sunbrella fabrics have been used in fashioning this fine outdoor furniture, and the Sunbrella fabrics allow water to drain quickly and freely. A five year warranty is offered against fade and material breakdown. Only premium grade aluminium is used, which means that the furniture will not rust or bend.

Twelve different lines have been introduced in the outdoor collection, which boasts a complete set, including lounge furniture, dining tables and chairs, bar stools, lounge chairs, sofas, coffee tables, pool lounges, rocking and swing chairs, and a unique daybed, each having its own unique design characteristics.

Opposite page: Studio style chair.
This page: At ease in the midst of nature.

"THESE ARE JUST
A FEW OF THE
OFFERINGS
FROM WARISAN,
WHICH PRODUCES
THE FINEST
COLLECTIONS OF
FURNITURE FOR
EVERY PURPOSE
AND SEASON..."

These pages: Comfort and
beauty typify the Warisan
collections.

A bit more on the daybed. Sling fabric and a teak wood frame have been used. Sling fabric is a popular new outdoor material. It has high durability and is weather resistant. This material is often combined with aluminium and sometimes with a wood frame.

Garis is a collection heavily influenced by Japanese minimalism. Its small, linear and repetitive pattern of wood slats are reminiscent of Japanese traditional façade. This collection actually started as an effort to utilize the abundant wood waste produced by factories. The coolness of the metal frame combined with the silent beauty of precise wooden slats give a vibe of understated luxury.

The Shelly collection caters to high end clients that enjoys a good sight of outdoor and the beach. The impressive size and shape of pieces in this collection is designed to ensure the maximum comfort of the user. It is a statement furniture that can act as a landmark for luxurious outdoor landscapes.

These are just a few of the offerings from Warisan, which produces the finest collections of furniture for every purpose and season. Take a look at the bounty, online or in the nearest showroom.
